

## COLORS THAT CREATE A LASTING IMPRESSION

### A CHOICE OF DISTINCTIVE COLORS

Select from a wide palette of colors, from bright white to jet black. Many are available in Solar Reflective (SR) formulations to meet Energy Star® and LEED qualifications. These cool coating formulations help lower the overall temperature of the structures, enabling savings on energy costs, and while providing exceptional durability.

### RESISTS THE TOUGHEST EXTERIOR AND INSTALLATION CONDITIONS

Created to withstand most anything that comes its way, our specially formulated WeatherXL silicone-modified polyester coating is designed to go where it will be abused—maintaining extreme resistance to abrasion, chipping and marring with tremendous color and gloss retention.

### UNEQUALED SERVICE AND TECHNICAL SUPPORT

- Unmatched lead times
- Highly responsive customer service
- The best technical support in the industry
